OUR ORGANIZATION AND EQUIPMENT

The technical education in Landscape Design and Horticulture of members of our firm added to our practical knowledge, long experience, and nineteen years' residence on the Eastern Shore enables us to serve you adequately. We are fully equipped to take care of your landscape and garden needs.

CONSULTATION FREE

We make no charge for coming to talk over your planting needs.

NOTE

We reserve the right to price plants selected by the customer according to their individual value.

Our Guarantee

Please Read

We guarantee our nursery stock when the customers do their part. We will replace any plant that does not commence to grow when supplied and planted by us, providing adequate care is given by the customer in the way of water and cultivation. The object of this guarantee is to give the true garden and plant lover the complete success with our plants that we want them to have. No responsibility can be assumed for the customer's neglect, nor for failure due to unusual weather conditions. We will gladly give the plants proper care at a nominal labor charge, should you be unable to care for them.

The prices are for plants dug and delivered in this vicinity. We ask your cooperation in consolidating deliveries during the present emergency.

Our Garden Store

Your patronage of our little garden store proves its convenience. We thank you for your patronage and trust you will continue to use it as a source for choice small plants, perennials, annuals and garden accessories. There is a salesman in attendance on week days from 8:00 a. m. to 5:00 p. m.

A GARDEN IS FOR PLEASURE

Gardening has long been a tradition of the leisured and quiet life on the colonial estates of the Eastern Shore of Maryland's Chesapeake Bay region. Our organization has been developed with the one thought in mind, of helping our clientele who have located here increase the Eastern Shore's fame as a gardened spot.

In this little booklet you will find listed plants that we know are particularly suited to the soils and climate of the Eastern Shore. All of the plants included with the exception of the fruit trees and roses are grown and tested in our nurseries.

Bulbs

The gay Tulips, Daffodils, and Hyacinths and the pretty little Scilla, Muscari and Snowdrops are some of the spring bulbs that flower well on the Eastern Shore. Write for our folder on Bulbs.

Planning Your Garden

The modern nursery client is usually interested in buying plants to give his home a setting or for the creation of an outdoor picture. It is the effect produced that counts. To create the garden picture, it should be planned. Planning can be done by simple staking on the grounds, by rough sketches, or by complete landscape plans. Any one of these methods can be used by us to suit your needs. The color, the texture, the growth and character of the plant materials used are considered in relation to their surroundings to produce the completed picture.

Roses

YOUR ROSE GARDEN

The Eastern Shore is a wonderful rose growing country. The winters are mild enough to grow a great variety. The two best seasons for bloom, spring and fall are long, making rich colored flowers and luxuriant foliage.

Plant your roses in rich warm, fairly heavy soil, spaced two feet apart and if possible protect from the wind by a fence or hedge. The soil should be prepared to a foot in depth and fertilized with manure or a well-balanced garden fertilizer. It is important to grow a healthy plant before letting it flower. Disbudding and not cutting too much of the foliage are good practices the first season. Keep your roses clean by spraying for black spot with Bordeaux, collecting all dead leaves and flowers and burning them. In the fall it is a good practice to remove the top layer of soil and replace with other top soil before mulching with manure.

Plant standard varieties, several of one kind so that you will have enough blooms for picking and plant only the very best grade of Roses—

BORDO MIXTURE POWDER—5 lb. can ----- \$1.00

A 12 per cent. mixture for black spot and other fungus diseases.

Lawns

To get the best lawns possible on the Eastern Shore, it is necessary to prepare the soil properly. It is advisable to cultivate thoroughly and loosen the surface several inches deep. Nearly all soils are sadly deficient in humus, so that it is desirable to add up to an inch to the whole surface of the lawn area. This should be well mixed in. Any good lawn fertilizer should be added; lime should be added only after testing your soil. Fall is the best time for seeding lawns. If you do not have competent help for preparing lawns, we do.

We offer the grass seed mixture found by continued testing to be the best for this section.

GRASS SEED

1 lb. -----	\$.55
10 lb. -----	5.00
20 lb. -----	9.00
100 lb. -----	45.00

FERTILIZER

A good fertilizer for lawn and flower garden is Vigoro which is a 4-12-4 organic fertilizer.

100 lb. bag ----- \$4.00

Perennials

A good perennial border is often the most attractive and satisfying feature of the garden. Use standard varieties planted in wide border against a good background. Have three zones of heights; bulky plants in the back, medium heavy and spikey plants in the middle ground and the dwarf varieties in front. Use color combinations and not color schemes.

We have developed a nice collection of over ninety varieties of one and two-year field grown perennials. Let us plan and make a perennial garden for you.
